

Thanks for purchasing Bolt, If this does not cover your needs feel free to [submit a ticket](#) here

# Installation:

## Choosing homepage variation:

As premium version comes with 3 homepage variations, you can only one of them as the homepage. Pick a variation and rename it to index.html to make it default page for your variation.

## Uploading to server:

Upload template files to root folder of the web server using an FTP client (like FileZilla, Cyberduck etc.) or use hosting Cpanel.

# Usage:

## Setting Countdown timer:

Open main.js file from the **assets/js** folder of the template, go to line: 34 and set your event date

## Setting Contact form:

Open **form-process.php** file from the **assets/php** folder of the template, go to line: 35 and replace the dummy email address with yours.

## Setting Google map:

Open **map.js** file from the **assets/js** folder of the template, go to line: 6 and replace the dummy **latitude/longitude** values with yours.

## Icon Fonts:

Available here: <https://lineicons.com/>
